- Increased resources to sustain recovery |
| Service Definition | Peer Recovery Support Coaching is a set of non-clinical, peer-based activities that engage, educate and support an individual successfully to make life changes necessary to recover from disabling mental illness and/or substance use disorder conditions. The activities that comprise this service are education and coaching. A key element contributing to the value of this service is that Peer Recovery Support Coaches appropriately highlight their personal experience of lived experience of recovery. Peer Recovery Support Coaches |
Peer Recovery Support Coaching

| Service Requirements | This service should be delivered primarily face-to-face, secondarily by telephone, or via social media. There are times when the individual may give permission for the Peer Recovery Support Coach to perform an activity for them, i.e. dealing with bureaucracy, trauma reactors (advocate).

Service activities defined under Peer Support Coaching:

- Directly initiating the individual to recovery community environments, and
- Linking the individual to needed services and assist in navigating systems and addressing barriers to independence and recovery
- Directly accompanying the individual and “walking them through new environments, services, and systems, when appropriate and necessary
- Build on the individuals strengths, needs, interest and capabilities
- Assist the person in their recovery needs
- Link the person to professional treatment when necessary
- Support (as appropriate) involvement with self help groups (AA, NA DBSA, Schizophrenic anonymous, etc.)
- Engage or re-engage the participant with his/her natural supports (family, friends and other loved ones, landlords, employers, neighbors, etc.)
- Identify service needs and assertively links the individual to community resources (employment, education, housing, social services, etc.)

| Staffing Requirements | Providers should have lived experience in recovery for serious mental illness and/or substance use conditions and have sufficient education, training and experience to develop and demonstrate core competencies including:

**Required Knowledge Areas**

- Science of recovery from addiction and/or mental health conditions
