Dear Chair Murray and Ranking Member Burr,

On behalf of the undersigned mental health and substance use disorder organizations, we respectfully request your support of the bipartisan, bicameral Garrett Lee Smith Memorial Reauthorization Act (S. 4271) led by Senators Jack Reed (D-RI) and Lisa Murkowski (R-AK). This legislation would reauthorize this impactful federal grant program to support states, tribes, and campuses with the implementation of youth suicide prevention and early intervention strategies.

Suicide is the second leading cause of death for youth in the United States.¹ The COVID-19 pandemic has only exacerbated this crisis with 1 in 5 teens considering suicide during the pandemic.² Mental health-related emergency department visits for suicide attempts in early 2021 among adolescents 12-17 years of age increased by 31% compared with the same period in 2019.³ We also know that not all demographics are impacted the same. In 2019, suicide rates among American Indian and Alaskan Native adolescents (ages 15-19) were 60% higher than the national average for all teenagers.⁴ From 2003-2017, Black boys (ages 5 to 12 years old) were twice as likely to die by suicide compared to white peers.⁵ LGBTQ youth are more than 4 times as likely to attempt suicide compared to their straight and cisgender peers.⁶ Despite these trends, federal investment in suicide prevention has remained nearly stagnant and current funding levels do not meet the current needs for this population. For example, applicants for Garrett Lee Smith grant funding would have required an additional $23.5 million in Fiscal Year 2019 alone.

From 2006-2015, Garrett Lee Smith initiatives have been shown to lower youth suicide rates and for a longer period of time in counties with these programs in comparison to counties without such programs in place.⁷ Another study showed that these programs implemented within counties was estimated to avert

---

79,000 suicide attempts.\textsuperscript{6} Building off these previous successes, the Garrett Lee Smith Memorial Reauthorization Act of 2022 would increase funding by approximately $25 million for a total of $72 million. Additionally, grant determinations must incentivize all elements an evidence-based framework of youth suicide prevention including leadership, training, identification, engagement, treatment, transition, and improvement.\textsuperscript{7}

Furthermore, the mental health of college students was already an area of concern before COVID-19, with rates of depression among students increasing by almost 250\% between 2000 and 2019.\textsuperscript{8} The pandemic has exacerbated these trends, evidenced by increases in depression, anxiety, substance use disorder, suicide, and post-traumatic stress disorder.\textsuperscript{9} However, while nearly half of colleges students report struggling with such concerns, just 40\% of those students have received any mental health services in the past year.\textsuperscript{10} The highest rates of negative mental health impacts are being seen most among vulnerable and underrepresented students, including students of color and LGBTQ+ students, who also face the greatest barriers in accessing mental health care.\textsuperscript{11,12}

The Garrett Lee Smith Campus Suicide Prevention Grant Program is the only federal program currently available to directly support mental and behavioral health services for college students. The Garrett Lee Smith Memorial Reauthorization Act would increase the authorization for these grants by $5 million for a total of $12 million, which would allow for more campuses to access these critical funds. It would better target this funding towards under-resourced institutions, such as HBCU's, MSI's, HSI's, TCU's and community colleges. Additionally, by focusing further on prevention and wellness promotion, the bill recognizes that better mental health is essential for students to be successful in their education, persist in college, and graduate.

We thank you for your consideration for this critical piece of legislation and look forward to working with you to continue to protect the health and safety of our nation’s youth.

Sincerely,

2020 Mom
