**Brief COPE**

We are interested in how people respond when they confront difficult or stressful events in their lives. There are lots of ways to try to deal with stress. This questionnaire asks you to indicate what you generally do and feel, when you experience stressful events. Obviously, different events bring out somewhat different responses, but think about what you usually do when you are under a lot of stress.

Each of us deals with things in different ways; I'm interested in how you've tried to deal with things. Each item says something about a particular way of coping. I want to know to what extent you've been doing what the item says. *How much or how frequently.*

Don't answer on the basis of whether it seems to be working or not—just whether or not you're doing it. Try to rate each item separately in your mind from the others. Make your answers as true FOR YOU as you can. *This information is confidential/belongs to you*; you may share if you choose.

There are no “right” or “wrong” answers! We’re looking for a general pattern, not a specific “score”
